

The image features a low-angle shot of a brick building facade with a 'WIREBOX' sign hanging from a window. A large, bright green diagonal stripe cuts across the scene from the bottom left towards the top right. The background is a clear blue sky. The overall aesthetic is modern and professional.

# WIREBOX

Introducing Wirebox,  
The **AWS Experts**

Who We Are

**We're a digital development agency based in Watford and Milton Keynes that creates engaging experiences that **excite, delight and captivate.****

In an ever-changing landscape, many businesses are left without guidance and find it difficult to innovate. Working with you, we form a partnership; an extension of your team. Understanding your business, the goals you have and the challenges you face. Collaborating to define a roadmap for success.

Ultimately, we're a hard-working community of doers and thinkers, united by a love of tech and a desire to do things differently.

What Is AWS?

## Amazon Web Services (AWS)

AWS is a subsidiary of Amazon and provides cloud computing platforms and APIs to private sector and public sector organisations.

Over the last 20 years, AWS has evolved into a diverse offering of products across Cloud Computing, Storage, Networking, Databases, Application Services and beyond.

With over 175 products on offer, it's easy to get lost; which is why we are on hand to assist. Being AWS Certified we are well-positioned to provide AWS managed services.

Our Process

## Tried, Tested & Proven

At Wirebox we implement the AWS Well-Architected Framework which describes key concepts, design principles, and architectural best practices for designing and running workloads in the cloud.

AWS's framework is based around 6 key pillars that are essential to build secure, high-performing, resilient, and efficient infrastructure for a variety of applications and workloads.

The framework also gives us access to a wide variety of tools which gives us the ability to easily evaluate workloads, identifying high-risk issues, and recording improvements.

### Operational Excellence

The operational excellence pillar focuses on running and monitoring systems, and continually improving processes and procedures.

### Security

The security pillar focuses on protecting information and systems including confidentiality and integrity of data, managing user permissions, and establishing controls to detect security events.

### Reliability

The reliability pillar focuses on workloads performing their intended functions and how to recover quickly from failure to meet demands.

## Performance Efficiency

The performance efficiency pillar focuses on structured and streamlined allocation of IT and computing resources.

## Cost Optimisation

The cost optimization pillar focuses on avoiding unnecessary costs. Including understanding spending over time and controlling fund allocation, selecting resources of the right type and quantity.

## Sustainability

The sustainability pillar focuses on minimising the environmental impacts of running cloud workloads. Meaning we can help you reduce your carbon footprint.

## What We Do

# Offering Support On A New Level

All of our managed cloud services are built bespoke for your business. All services include:

### Firewall & Access Management

Keeping the bad guys and bots out

### Monitor Server Resources

We keep your cloud resources fast

### Managed Server Patching & Testing

Keeping your systems protected against new security threats

### Platform Instrumentation

Installing tools to allow us to monitor every aspect of your cloud deployment

### Security Log Streaming & Analysis

We automatically check your security logs

### Advice & Support

A helping hand along your journey as your business and cloud requirements continue to grow.

### Penetration Testing

We also run penetration tests on your system every 6 months. This means that we attempt to perform ethical hacks to make sure nobody else can.

# WIREBOX

## **We're Just At The Start Of Our Journey Together**

We appreciate the opportunity to submit our offering to you. If you have any questions, please don't hesitate to contact us.
